

# Creating a Better Online Presence for a Private Health Foundation

## OVERVIEW

The California Endowment is a non-profit organization founded in 1996 focused on supporting organizations that pursue social justice and health equity for all Californians. As the largest private health foundation in the state with over \$3 billion dollars in assets, they have awarded over 22,000 grants totaling \$2.9+ billion to community-based organizations throughout California.

2023 Silver Award Winner

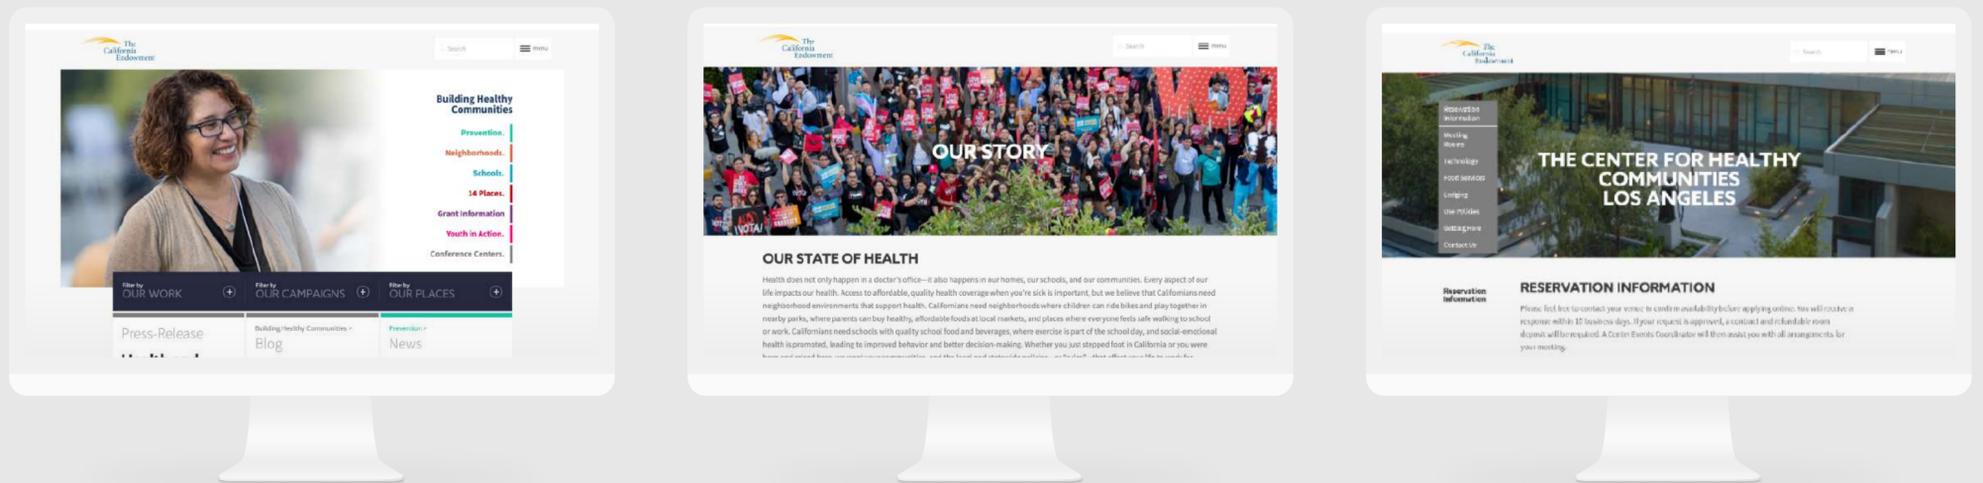

A new 10-year-plan led The California Endowment to seek out help to transform their site and communicate their new plan.

## DISCOVERY

**The California Endowment reached out to us just as they were wrapping up their successful execution of Building Healthy Communities and moving into a year of transition before embarking on a new 10 year plan. This new 10 year plan needed to be communicated on their website, as they sought to increase their impact on providing health equity and pursue social justice for all Californians.**

Besides needing to communicate their new vision, the site itself needed a makeover. An outdated design and an overwhelming navigation and architecture left visitors confused, disoriented, and lacking a full picture of what The California Endowment did. Both website visitors and internal stakeholders struggled trying to find specific information on the site, and the site contained a lot of outdated content, resulting in broken links and bad SEO.

After conducting extensive key stakeholder interviews, we dove deep into a website audit, analytics audit, and usability testing. For the usability testing, we used a tool that allowed us to observe anonymous website visits so we could see what pages people were going to on the site, where they were getting lost or confused, and what issues they ran into.

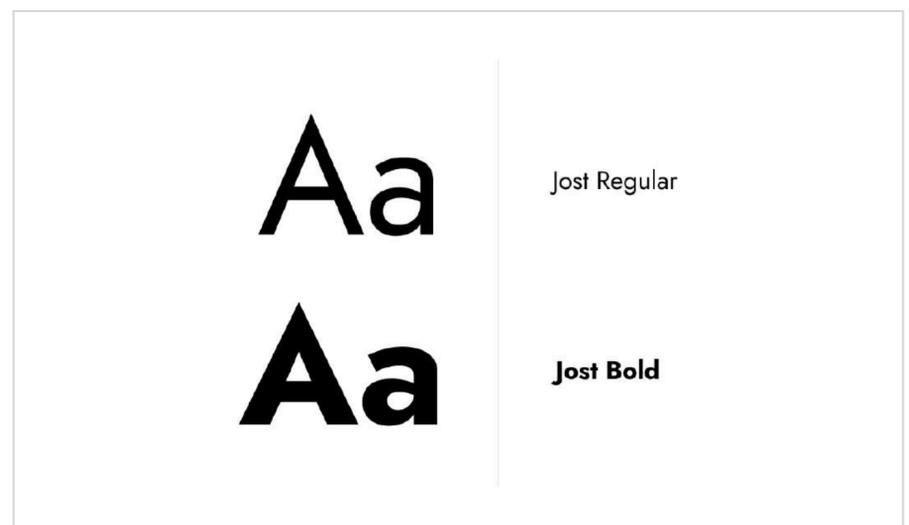

Before

**After compiling all of the data from our interviews, audits, and studies, our research team analyzed everything. We pulled from what we learned during our deep dive into data to build out the user experience strategy (UX) for the redesign.**

The first thing we focused on was creating a new and more efficient site map that simplified access to the valuable information visitors were looking for. At the same time we were laying out the site map, we were also defining the content strategy for the redesigned website. The content strategy was central to ensuring only up-to-date and relevant content would remain on the site, and helped us identify content gaps that existed where new content would need to be created to fully tell the story of the new 10 year plan.

After the site map and content strategy were in place, it was time to wireframe the structure of the site. Wireframing allowed us to lay out the priority of content on each page across the site, to ensure an optimal user journey. As a very collaborative process, wireframing gave the team at The California Endowment an accurate preview at how the new site was structured and allowed us to iterate rapidly together to create an ideal user flow.

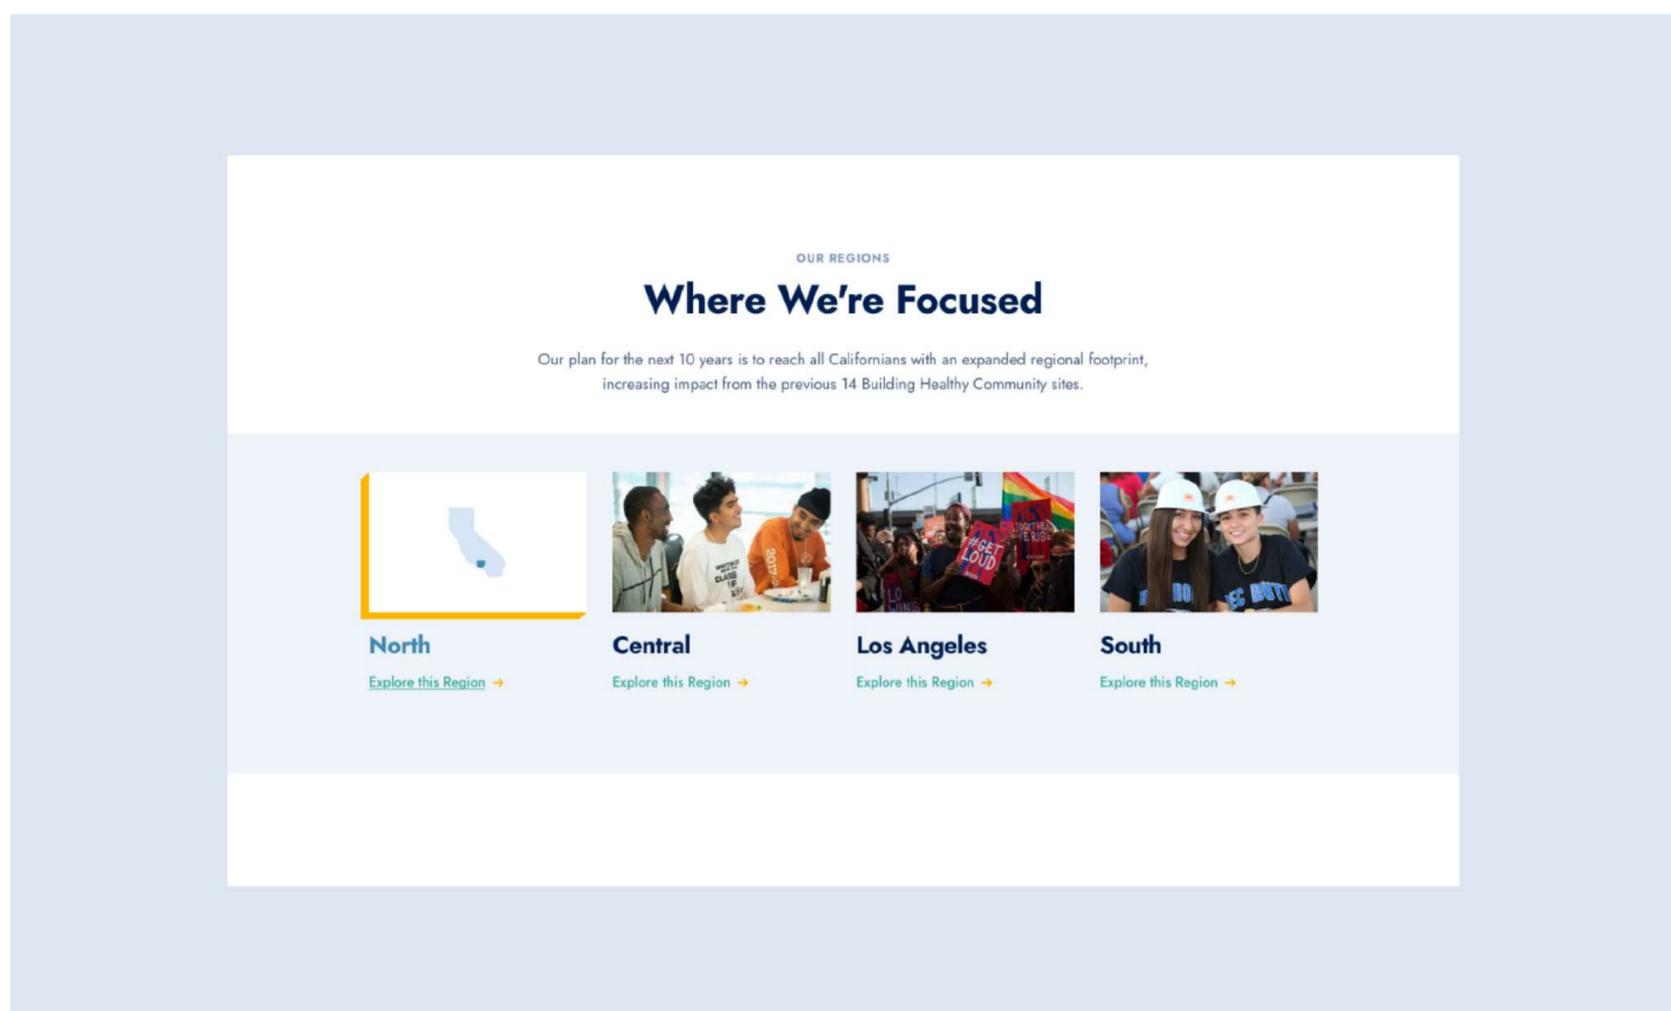

## BUILD

**Once the structural planning was in place, we were ready for the fun part – design! Design is where things come to life as we pulled together the colors, images, fonts, and iconography that would best represent who The California Endowment is.**

For the fonts used on the site, we chose an accessible, uplifting, and friendly sans serif font that gave a nod to the optimistic vision pursued by The California Endowment. The color palette for the site echoes these same optimistic and inclusive tones, being grounded in a bright golden color (giving a nod to the “Golden State”) and a deep, compassionate blue. The imagery used across the site shows the action, movement, and change that The California Endowment seeks to bring while pursuing their mission, and embodies the Californians they serve. Even the micro-animations we planned during this phase hinted at upward mobility.

From the technology side of things, we chose to implement our custom site build on the extremely user friendly WordPress CMS. Everything was customized and structured on the backend of the site in a way that empowers the team at The California Endowment to keep the site fresh and up-to-date.

The front-end development of the site utilizes the latest HTML/CSS and was coded on a responsive framework to ensure an optimal experience for website visitors on devices of all sizes and shapes. It doesn't matter if someone is visiting on a tiny mobile phone or a ginormous desktop monitor – the site will remain easy to navigate and engage with at all times.

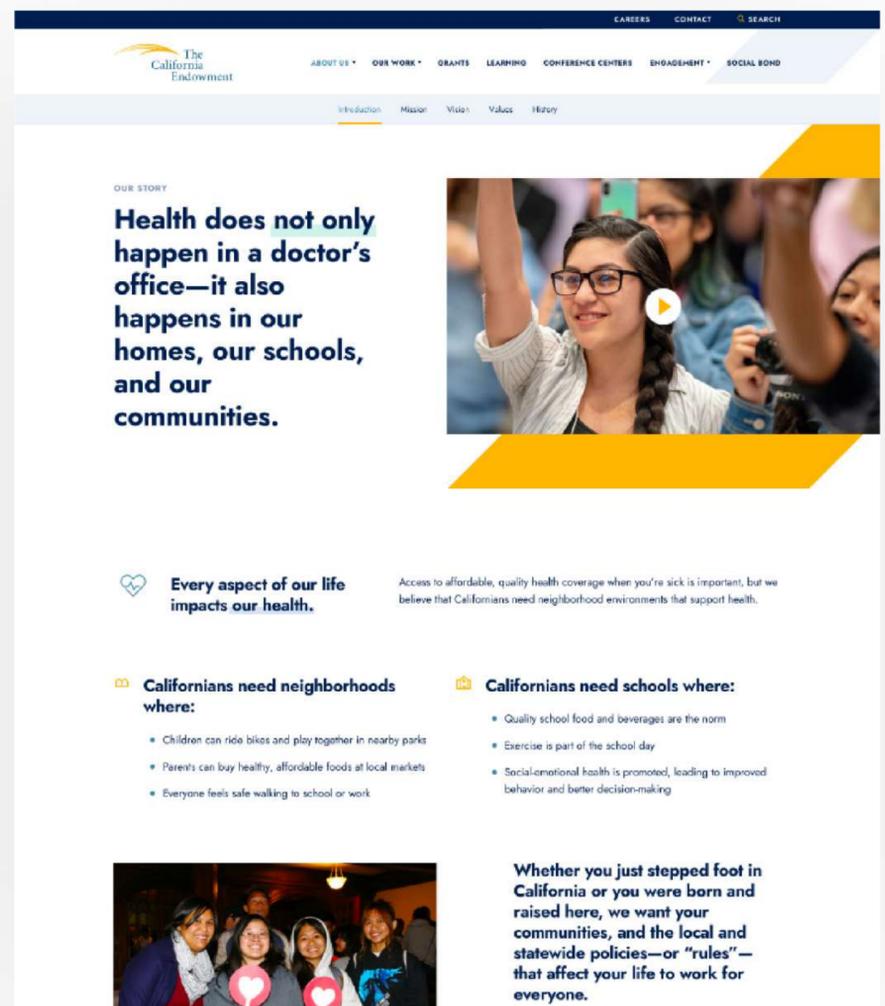

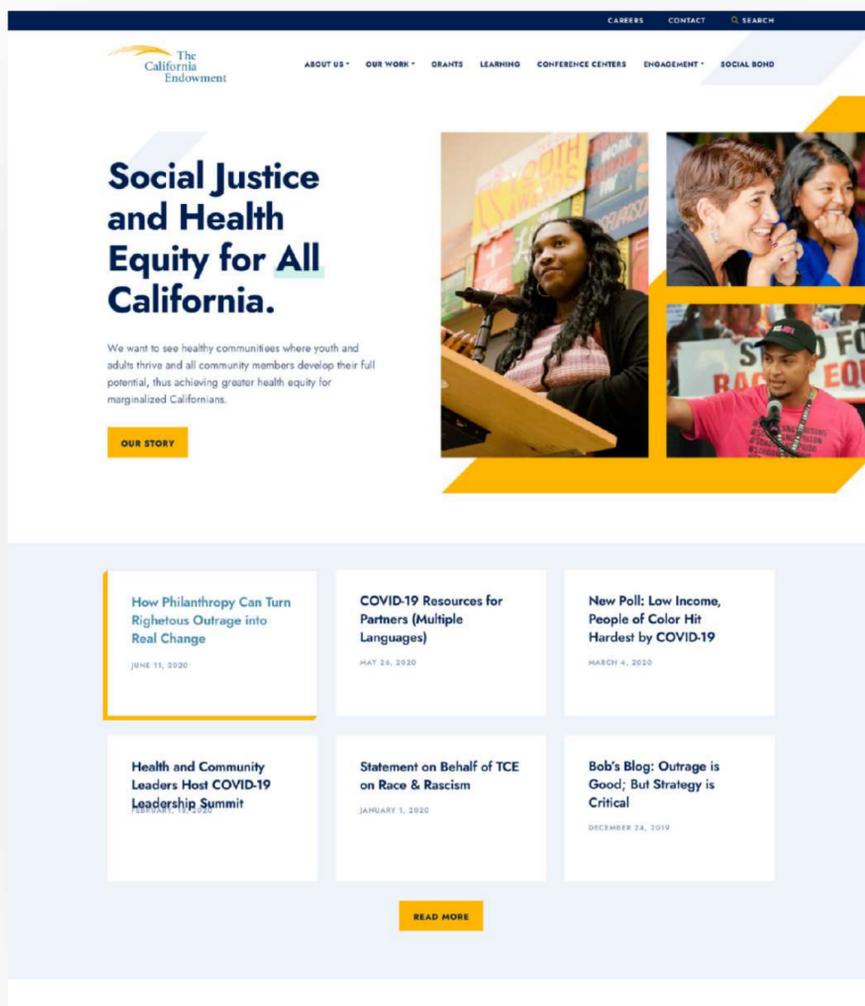

## TEST & LAUNCH

**After thoroughly planning, designing, and developing the ideal website, we tested it on multiple mobile and desktop devices and in various browsers to ensure a universally accessible and seamless experience.**

Throughout the entire project, we followed an Agile/Scrum process, in which we worked with the key stakeholders at The California Endowment to incorporate their feedback into the project while making the elements and pages ready for launch as we progressed. This process allowed our team to test and get effective client feedback at an early stage without any last minute mishaps.

In line with Agile practices, once the MVP version of the site was ready to launch, we rolled that out to the public. As additional pages and sections were ready to release, those were rolled out with precision during ensuing sprints.

## CONFERENCE CENTERS

# The Center for Healthy Communities Los Angeles

**The first of The Center for Healthy Communities' venues, the Los Angeles facility was built in response to the growing need for convening space by non-profit organizations engaged in health issues.**

Bordering Chinatown and Chinatown, two of the oldest and most culturally significant neighborhoods in the city, the LEED-certified building was designed to embody the values of wellness, diversity, and accessibility.

Awarded by a general contract, the design reflects a distinctly Californian sense of place, emphasizing the relationships possible between indoor and outdoor environments. Architectural references to Union Station, Terminal Annex and Mission design are specific localities that were gathered and reinterpreted in conversation with the specific history of the nearby Los Angeles River Greenway, evoking the sense of identification with the natural and cultural landscapes of Southern California.

[DOWNLOAD THE VISUAL GUIDE](#)

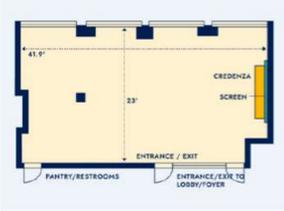

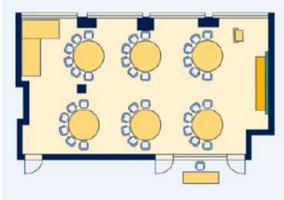

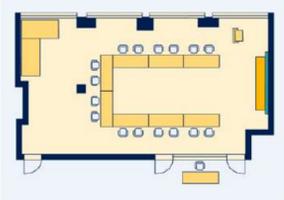

If your request is approved, a contract and refundable room deposit will be required and a Center Events Coordinator will then assist you with all arrangements for your meeting.

## Uptown

This 900 square-foot meeting room is suited for small gatherings, meetings, and breakout sessions.

Capacity	Fixed A/V Capabilities
Theater: 70	Projector / Screen
Banquet: 60	Computer
Hollow Square: 34	Wireless Microphones
U-Shape: 26	Distributed Audio
Classroom: 24	Wireless Laptop Projection
	Audio Conferencing

## Want to Bring Social Justice and Health Equity to your Community?

It begins and ends with people power.

Whether you just stepped foot in California or you were born and raised here, we want your communities, and the local, regional, and statewide policies (or "rules") that affect your life, to work for everyone.

Find out what you can do to organize within your community, and change the health outcomes for everyone.

## Our progress & learnings

The California Endowment (TCE) is committed to promoting shared learning among our grantees, partners, board, and staff to create healthier communities.

## Building Voice & Power

Historically excluded adults and youth residents have no voice, agency, and power in public and private decision-making to create an inclusive democracy and close health equity gaps.

BHC partners contributed to 1,200+ wins...

The California Endowment now has a living, breathing site that is easy for them to keep fresh and up-to-date.

#### CLOSING THOUGHTS

Thanks to an in depth user strategy phase, The California Endowment now has a modern and approachable website that conveys their mission in a clear way. With clean development and a simple navigation, their new website is allowing them to make an even greater impact than before.
